Complex Problem Solving  
Object Oriented Programming  
Data Structures & Algorithms  
Database Management System  
Web Programming  
Advance Programming (Java)  
Intro to Artificial Intelligence  
Distributed Computing

## Career Objective

I am a Full Stack Developer with over 2 years of freelance experience, having successfully delivered a wide range of projects from small-scale solutions to large, business-critical applications. My expertise spans building modern business websites, developing desktop applications with intuitive GUIs, and deploying secure, scalable solutions on AWS.

I take pride in solving complex client problems with clean, efficient code while ensuring timely delivery and long-term maintainability. Client satisfaction is my top priority, reflected in the positive feedback I have received on [Fiverr](#).

## Professional Skills

- Full Stack Development
- Chatbots
- PHP
- Responsive Web
- AWS / Nginx / Git
- React NodeJS
- REST APIs
